

## Community Supported Agriculture CSA

Dear Friends,

EatMoGreens.com offers members' CSA options during the year ranging from:

- **Full share** from March – December 31, which includes the bonus of free weekly shares for January and February when committing by year's end and paid for by January 15<sup>th</sup>.
- **Half share** from March – December, with a pick-up of a full share every two weeks. Bonus is not available to the half share members.
- **Summer-Winter** share from June 15 – December 31, with a weekly full share pick up

**Cost:** based on our market prices of \$27-\$28 per week

- |                |        |           |                            |
|----------------|--------|-----------|----------------------------|
| - Full share   | \$1200 | March –   | December weekly pick up    |
| - Half share.  | \$600  | March –   | December bi-weekly pick up |
| - Summer share | \$775  | June 15 – | December weekly pick-up    |

CSA membership is payable at the beginning of your share date in cash or checks made out to Peter Halvorson.

**What we grow throughout the year is shown on our website**

**<https://eatmogreens.com/what-we-grow/>**

**Pick up days and locations:**

At the farm: Tuesdays after 2pm, Wednesday at Leesport Market, Thursday, Friday, Saturday by appt at the farm. If possible, please keep to the same day for your pickup and we will accommodate your preferences.

The choice of what produce goes to CSA members is at our discretion based on readiness, freshness and availability of produce. CSA members get the best of our produce ahead of wholesale and market accounts.

**CSA background and origin.**

CSA options have been offered for many years, they are intended to support small farms and let people share in the innate risks of farming.

It is important that you know that the CSA membership is not refundable. It is one of the foundational principles that CSA members everywhere share in the risks of unforeseen disasters or weather/nature events beyond our control that may destroy or damage our crops. This allows farmers to plan ahead secure their crops and be financially supported against natural risks.
